

## TECHNICAL BULLETIN

**To:** Nova Users  
**From:** Nova Technical Support Services  
**Date:** 13 JULY 2016  
**Subject:** Nova Network Configuration

The following diagram shows a typical network configuration for a multi-port Nova appliance. In this diagram, the ETH0 port is used exclusively for Nova management – note that it could also be connected to and protect a separate LAN.

The diagram reflects the capability of the 8-port SWN1U8 appliance.
